

PRESS RELEASE:

**Atlantic Concealment Introduces
WavePortal™ Series a Microwave Concealment Solution**

FOR IMMEDIATE RELEASE: February 13, 2009

Atlantic Concealment, L.L.C. of Scarborough & Windham, Maine announced the introduction of its new WavePortal™ Series a concealment solution designed specifically for the microwave frequency bands of 1 - 40 GHz market segment of wireless carrier industry.

The demand for communication and technology advancements and the subsequent clutter of rooftop communication equipment, property owners, tenants, state and local governments are demanding that communication equipment be hidden from view while blending into the urban setting and site property.

Atlantic Concealment has engineered, developed and designed the WavePortal™ Series, which are antenna and equipment shelter enclosures fabricated from the most advanced microwave RF friendly composite materials. The WavePortal™ Series addresses the issue of aesthetics, plus compliance with architectural standards and zoning ordinances pressuring carriers and private network operators to conceal communication equipment installed on urban or metroplex tenant rooftops.

Atlantic Concealment utilizes high performance composite materials that have been proven throughout the world in severe environments as well as in a wide array of microwave frequencies. (1 - 40 GHz) All the WavePortal™ Series materials exhibit excellent environmental and mechanical characteristics while delivering the low loss electrical characteristics that are required in the transmission of microwave signals.

Atlantic Concealment's designs can be Custom Designs or as simple as shelters or screen walls with a modified aperture window to direct your signal through. In each and every case Atlantic Concealment works closely with RF Engineers and with the assigned A&E Group to provide a solution that meets the requirements of all parties.

Atlantic Concealment offers turnkey concealment solutions from the site assessment, feasibility study, mechanical requirement review, photo-compositions for customer and zoning purposes, to the final design, fabrication and installation of your WavePortal™ site.

About Atlantic Concealment

Atlantic Concealment, L.L.C. is headquartered in Scarborough, ME with fabrication facilities located in Windham, ME. The company designs, engineers and manufactures innovative wireless site concealment solutions for wireless carriers seeking concealment options that meet the zoning requirements of specific markets and RF requirements that network engineers demand.

These products and designs feature extremely low-loss electrical characteristics while exhibiting architectural elements and features that meet the needs of the most demanding property owners. Atlantic Concealment designs are a cost effective alternative to other solutions on the market today.
